# NAVARA NP300 YS23 DPF SIMULATOR

## MAF SENSOR HARDWIRING INSTRUCTIONS

The DPF module comes included with 2 piggyback connectors for connection to the MAF sensor signal.

If desired, these connectors can be removed and the DPF module wire soldered directly to the factory MAF signal wire.

**Inside tubing of DPF module loom running to MAF sensor is a single white wire.**

**Connect white wire to factory green wire at MAF sensor (splice in, dont cut factory wire)**
